School: Central Valley Christian School
Grade Level: 4th

Theme/Lesson: We are the body of Christ.

Your objectives in this lesson:

a.) students will be able to identify their own gifts that contribute to the community.

b.) students will be able to realize every person in a community has a gift.

Materials needed:

- 18 eye cut outs
- 2 bodies (cut into parts)

Idea:

First, each person will get an eye. Put students into groups and tell them to build a body.

Second, discuss the functionality of the body made, will the body function just made of eyes?

Third, give each student a body part. In groups, build a body.

Fourth, discuss the functionality of this body. Why is the second body more functional? (because each part has a different role)

Fifth, each student writes their own gift or talent on the back of their body part, (cut out).
