

What they're saying about the program ...

I learned so much about how to run a school and about the way God is using Christian education to develop responsible disciples of Christ. (Intern)

I came away from the meetings with a strong sense of the leaders' commitment and calling to the task, and in God's grace for handling it. (Intern)

"My experience was incredible. I had a real feel for what it was like to be leading a school." (Intern)

The idea for mentoring others is a very valuable one. CSI is to be commended for continuing the program. I would highly recommend participation to other administrators. The benefit for me besides working with someone is that mentoring gives me a mirror so I can see myself through the eyes of another leader. (Mentor)

Spending time in prayer and confession as administrators is crucial. Bringing your cares and concerns together before the Lord is of utmost importance. (Intern)

The shadowing of my Mentor was one of the highlights of the semester. (Intern)

I think the experiences of this program will provide the foundation and context for the rest of the work (courses or other activities in leadership), I may choose to pursue. (Intern)

During the course of this mentorship program, I learned that I do have gifts in the area of administration, and I would like to continue to develop them. (Intern)

"The experience caused me to really evaluate what I do and how I do things." (Mentor)

It was delightful to go through this program with him and I probably learned as much from him as he did from me. (Mentor)

I certainly see the need for us to be cultivating and encouraging teachers with leadership skills. I definitely would participate in the program again. (Mentor)
